SIGMAGYR® RVP200 –
Simply Comfortable

SIGMAGYR® RVP200 defines room comfort by creating a warm and cosy environment and reducing energy consumption

One for all, one for overall

A heating controller which automatically compensates for outside temperatures, SIGMAGYR® RVP200 optimises living comfort and reduces energy consumption. SIGMAGYR® RVP200 is suitable for all types of heating systems in:

- single family homes
- terraced houses and apartment buildings
- small commercial installations.

Simple operation

SIGMAGYR® RVP200 features a user-friendly interface, with easy-to-follow instructions that enable users to quickly operate the unit.

SIGMAGYR® RVP200 also takes advantage of heat gains – because in heating, less is more

SIGMAGYR® RVP200 automatically compensates for changes in both inside and outside temperatures, as well as other heat sources. This functionality optimises room comfort and energy use.

Two new room units for remote operation

The QAW-room units allow individual, remote temperature settings, diag-nostics and control. Two, easy-to-use versions are available:

QAW50 – room unit with analog user interface

- program mode selector
- temperature set point adjustment knob
- presence switch, to activate room settings when people are present

SIGMAGYR® RVP210:
with opened door

QAW70 – room unit with digital user interface

- program mode selection buttons
- digital display of time, temperature and settings
- weekly time switch
- temperature set point adjustment knob
- presence switch, to activate room settings when people are present
- status indication.

Other features of SIGMAGYR® RVP200 include:

- ECO function
- adjustable room temperature compensation
- frost protection for the installation and living spaces
- three different types of clocks.
